Pitt Preface	7
Introduction	9
0.1 Notes about these notes	9
0.2 About analysis	11
0.3 Basic set theory	12
0.4 Additional exercises	24
1 Real Numbers	25
1.1 Basic properties	25
1.2 The set of real numbers	29
1.3 Absolute value	35
1.4 Intervals and the size of \mathbb{R}	39
1.5 Decimal representation of real numbers	42
1.6 Additional exercises	45
2 Sequences and Series	47
2.1 Sequences and limits	47
2.2 Facts about limits of sequences	55
2.3 Limit superior, limit inferior, and Bolzano-Weierstrass	65
2.4 Cauchy sequences	73
2.5 Series	76
2.6 The number e	87
2.7 Additional topics on series	91
2.8 Additional exercises	95
3 Continuous Functions	97
3.1 Limits of functions	97
3.2 Continuous functions	104
3.3 Min-max and intermediate value theorems	110
3.4 Uniform continuity	116

3.5	Continuity of inverse functions	121
3.6	Additional exercises	123
4	The Derivative	127
4.1	The derivative	127
4.2	The inverse function theorem	133
4.3	Mean value theorem	135
4.4	Taylor's theorem	141
4.5	Additional exercises	143
5	The Riemann Integral	145
5.1	The Riemann integral	145
5.2	Properties of the integral	153
5.3	Fundamental theorem of calculus	161
5.4	Application: logs and exponentials	167
5.5	Additional exercises	173
6	Sequences of Functions	175
6.1	Pointwise and uniform convergence	175
6.2	Interchange of limits	181
6.3	Additional topics on uniform convergence	187
6.4	Picard's theorem	193
6.5	Additional exercises	199
7	Metric Spaces	201
7.1	Metric spaces	201
7.2	Open and closed sets	208
7.3	Sequences and convergence	215
7.4	Completeness and compactness	219
7.5	Continuous functions	224
7.6	Fixed point theorem and Picard's theorem again	227
A	Logic	231
A.1	Propositions	231
A.2	Quantifiers	234
A.3	Negating a proposition	235
A.4	Proofs	236
B	Equivalence Relations	239
B.1	Binary Relations	239
B.2	Equivalence Relations	239

<i>CONTENTS</i>	5
B.3 Application: Construction of the Rational Numbers	241
Further Reading	247
Index	249
